Subject: I hope the Department of Justice considers well before punishing

I hope the Department of Justice considers well before punishing innovative enterprises in our country. Microsoft has improved much of our systems of communication and i stongly feel that the case against their company is more or less moot. There is always competition in any field and the best systems will succeed.

I urge your department to let market forces reward or punish public ventures and spare the court system for more serious injustices.

Thank you for your attention, Florence A. Friedrichs-7045 HWY 135
